Current events Recent changes Random page Help ILC VLe Kpacel KTreaming! Viblorr Aparch Libis sites	Featured Photo	Feature	Copher Proxy Copher Proxy Exclude simple hostnames Bypass proxy settings for these Hosts & Domains:

Open Safari and go to **Preferences** and click on **Advanced**. Click on **Proxies Change Settings**. In Proxies, set your Web Proxy and Secure Web Proxy to proxy7.up.edu.ph (or whatever proxy server you use on campus), port 8080. Most importantly, type in the exception. For example, "10.\*" for servers inside Dilnet (or whatever server address that should be bypassed). Click OK. Note that the addresses are separated by commas.

Click on the (1) Chrome Settings where you should find **Options**. Under Options, click on (2) Under the Hood and on (3) **Change proxy settings**. It should yield to Internet Properties where you should see (4) Connections and (5) LAN Settings. Click on (5) and it should yield to a screen where (6) Proxy Server is found. Tick the option "Use a proxy server for your LAN.." and click on (7) Advanced. That should give you Proxy Settings where you get to click set (8) HTTP and (HTTPS), Type in your proxy server settings. Most importantly, add in (10) Exceptions the server that should bypass the proxy. In this example, "10.\*" means all servers starting with 10. will not pass through the proxy server. Click OK.
